SUMMARY

Highly motivated Data Scientist with a U.S. Master's in IT and Management (Data Management and Analytics, CGPA 3.90/4.00). Over 2 years of experience in data analysis, machine learning, and cloud-based data processing, delivering actionable business intelligence for enterprise clients. Proficient in Python, SQL, and visualization tools (Tableau, Power BI, Jupyter Notebook) with hands-on expertise in AWS, Azure, and Hadoop. Skilled in developing data pipelines, predictive models, and dashboards to drive strategic decisions. Seeking to leverage strong analytical, statistical, and problem-solving skills to contribute to Ascendeum's mission of maximizing digital advertising returns through data-driven solutions.

EDUCATION

Master of Applied Science in Information Technology and Management *Data Management and Analytics* August 2020
Illinois Institute of Technology, Chicago, IL CGPA **3.90/4.00**

Bachelor of Engineering in Information and Communication Technology July 2016
Manipal Institute of Technology, Manipal, Karnataka, India CGPA **5.80/10.00**

Artificial Intelligence & Machine Learning for Geodata Analysis (Certificate Course) September 2024
Indian Space and Research Organization

All India Senior School Certificate Examination 2009 **58.2%**

All India Secondary School Examination 2007 **89.4%**

St. Anselm's Pink City Sr. Sec. School, Malviya Nagar, Jaipur

TECHNICAL SKILLS

- **Languages:** Python (Scikit-learn, Pandas, NumPy, Matplotlib, PyTorch, TensorFlow), SQL, Java, Scala, C++
- **Cloud Technologies:** AWS (EC2, S3, Lambda, SageMaker, Athena, Glue, QuickSight), Azure (Synapse), GCP (BigQuery)
- **Data Processing:** Relational (Postgres, MySQL, Oracle, SQL Server), Non-relational (MongoDB, Cassandra, DynamoDB), Spark, Hadoop, Redshift, Airflow, DBT
- **Data Analysis:** Hypothesis Testing (A/B, t-tests, ANOVA, Chi-squared), Regression (Linear, Logistic, Ridge/Lasso), ARIMA, Neural Networks
- **Visualization Tools:** Tableau, Power BI, Jupyter Notebook, Grafana
- **Other:** Data Modeling, Data Warehousing, Operations Research, Microservices, Docker, Kubernetes, KubeFlow, MLFlow, Linux, DevOps (Code, Chef, Puppet)

WORK EXPERIENCE

mLogica Inc – Santa Ana, CA, USA Jan 2020 - May 2020

Analytics Intern | Python, AWS, Athena, QuickSight, SageMaker

- Ingested and preprocessed large-scale client data into AWS S3 and Athena using Hive DDL, enabling efficient querying with Presto for business intelligence.
- Developed complex SQL queries with joins, window functions, and aggregates, visualized insights using QuickSight dashboards to support client decision-making.
- Built and optimized regression and gradient boosting models with SageMaker, applying cross-validation to enhance predictive accuracy for business outcomes.

College of Computing, Illinois Institute of Technology – Chicago, USA Jan 2020 - May 2020

Graduate Teaching Assistant | ITMD 321 Data Modelling and Applications

- Delivered lectures on predictive modeling (TensorFlow/Keras), Spark/Scala, and SQL analytics, mentoring students on cloud-based data processing.
- Designed a cloud-native data pipeline on Azure Synapse, reducing latency by 40% for scalable research applications.
- Assisted in creating course materials, grading assignments, and clarifying complex data analytics concepts.

e-Connect Solutions Pvt Ltd (CMMI Level 3) – India Oct 2016 - Jan 2018

Business Engineering Group Executive | Java, Oracle, Linux, MS Excel

- Designed modules for DMGOMMS, a transactional system serving 50K+ daily users, automating processes to boost client revenue.
 - Consolidated multi-source data to create dashboards and MIS reports, driving actionable business insights.
 - Conducted User Acceptance Testing (UAT), ensuring robust production releases and cost savings.
- Projects: DMG, EEMS, and RajSampark and RIICO (Pension).

ACADEMIC PROJECTS

Cloud-Optimized Serverless Image Processing & Big Data Analytics Pipeline

AWS, Lambda, DynamoDB, Hadoop, Sqoop, Grafana, Python

- Engineered a serverless AWS pipeline using Lambda and DynamoDB, reducing compute costs by 50% through NoSQL migration and EC2 auto-scaling.
- Implemented Hadoop and Sqoop for large-scale data processing and transfer, enabling cross-platform analytics.
- Built Grafana dashboards for real-time performance and resource utilization insights, supporting data-driven decisions.

Bank Marketing Analysis (ITMD 527 – Data Analytics)

R, Naïve Bayes, Decision Tree, KNN, Regression, Random Forest, Neural Networks

- Developed and compared ML models (KNN, Random Forest, Neural Networks) to identify prime loan deposit candidates, achieving 95.17% accuracy with KNN.
- Applied hyperparameter tuning and gradient boosting to minimize overfitting and enhance predictive performance.

DataMart Application (ITMD 526 - Data Warehousing)

Pentaho, BigQuery, Tableau, SQL

- Designed a star-schema data mart using Pentaho, implementing slowly changing dimensions and fact tables for efficient analytics.
- Created de-normalized fact and dimension tables from normalized SQL sources, enabling drill-through and drill-across reporting.

ACADEMIC PUBLICATIONS

SQL Injection Attacks

ForenSecure 2019, Wheaton, IL, U.S.A. 2019

Prediction of Academic Performance Using Gravitational Search Based Neural Network Algorithm

International Conference on Inventive Computation Technologies, Coimbatore, India 2017
